## A growing specialty chemical industry

We believe in research, innovation and development to provide natural solutions that respect the ecosystem's equilibrium, while offering efficient alternatives to the consumption of our precious natural resources.

Since 1955 we have been active in the production, sale, research and development of organic anhydrides and their derivatives.

Our membership in the major chemical intermediates sector allows us to play a central role in activities ranging from petroleum refining to the production, sale and market distribution of finished products.

## Integrated Business Model

Polynt Group manages the entire production-distribution chain internally through these operations:

- Research and development
  - Production planning and sourcing of raw materials
  - Production process, quality control and logistics
  - Storage
  - Sales and after-sales assistance with finished goods
- 

## Passion, expertise, technology and innovation

Our key products are:

- Anhydrides: Phthalic, Maleic and Trimellitic
- Specialties: GPP, SPP, Special Anhydrides, Special Esters, Catalysts and Acids
- Composites: UPR, Moulding Compounds, SMC, BMC, Gel Coats and Bonding Pastes
- Coating Resins
- Others

## A Global Company: Innovation & Quality

Polynt Group's global footprint spans four continents with manufacturing and commercial facilities, allowing us to provide our customers with innovative and sustainable solutions.

Throughout our production chain, Polynt Group is a pioneer in responsible innovation: we combine design, quality and progress, while protecting the environment, improving the process technology.

# Our History

## Start-Up

The FTALITAL industrial complex in Scanzorosciate (Bergamo-Italy) starts its production of Phthalic Anhydride used in the derivatives production of synthetic materials

1955

Alusuisse S.A. acquires the chemical company Lonza AG and creates a Chemistry Division. In 1979 Alusuisse S.A. acquires Distillerie Italia S.p.A.'s site in San Giovanni Valdarno (Arezzo - Italy) in which Unsaturated Polyester Resins and Plasticizers are produced

1974  
1979

Expansion of the plant of Scanzorosciate: it starts Trimellitic Anhydride and Malic Acid production

1990

Expansion of Ravenna's plant: it starts Maleic Anhydride and (from 1999) Tetrahydrophthalic Anhydride's production

1994

Lonza merges with Lonza Compounds S.p.A. (formerly Molding Compounds S.p.A.) and Lonza Composites S.r.l. (formerly Reglar S.r.l.)

2003

1962

Alusuisse S.A., a Swiss multinational, acquires FTALITAL industrial complex

1984  
1985

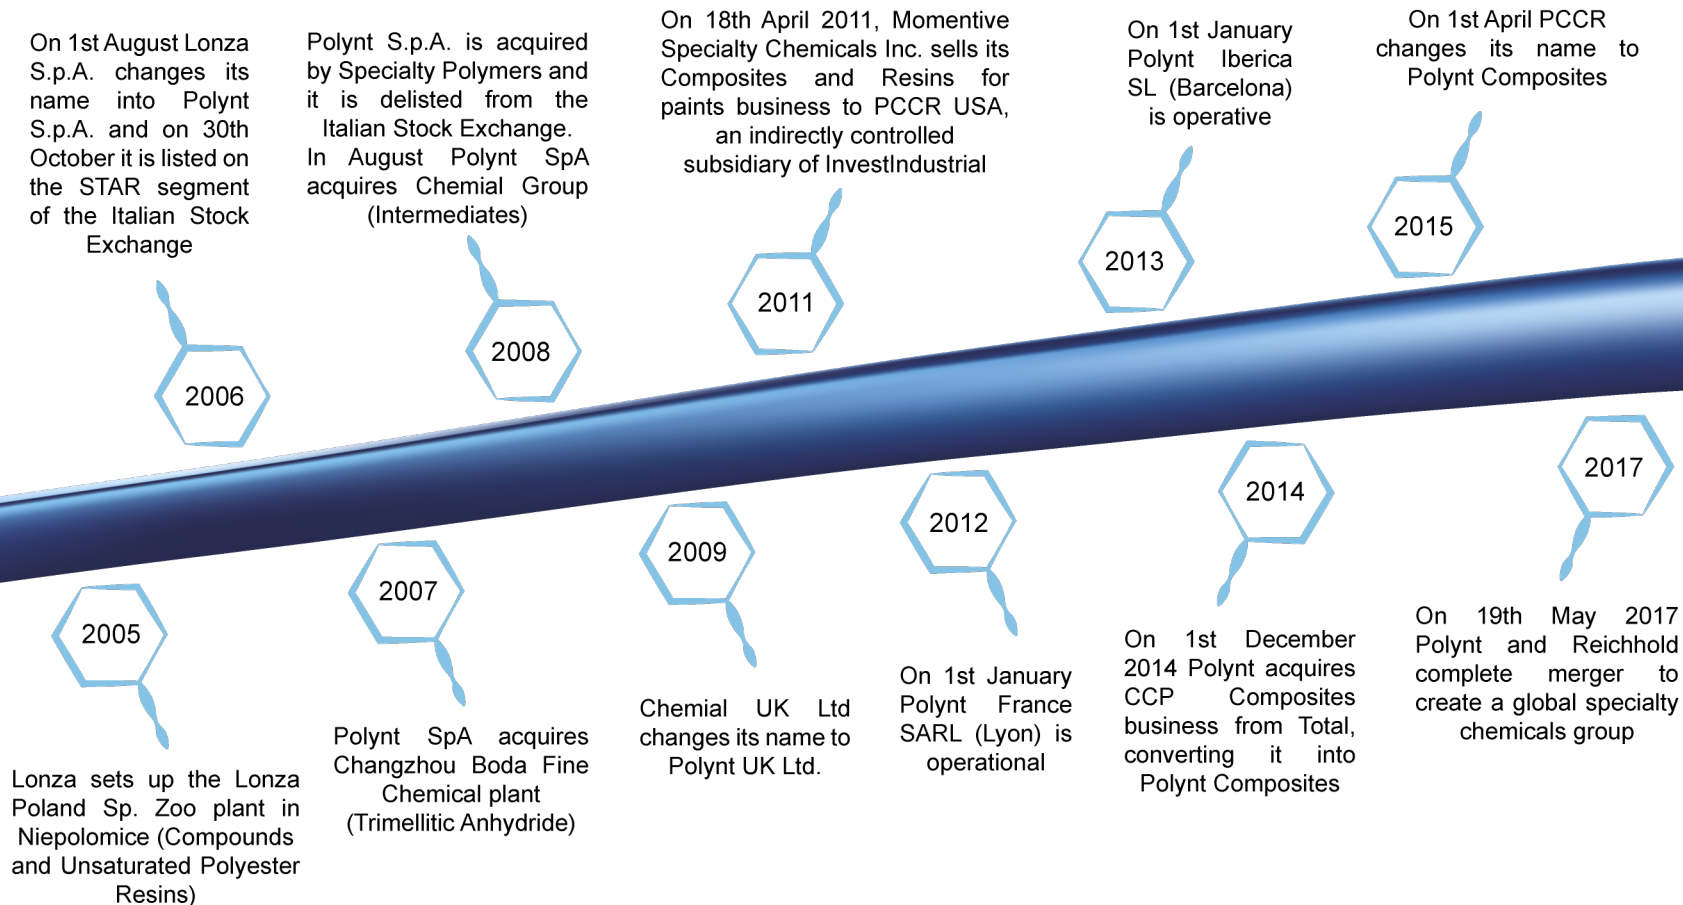

Lonza acquires Snial U.P. Resins and also Molding Compounds S.p.A. (reinforced composite materials based on Unsaturated Polyester Resins)

1991

Lonza acquires Reglar S.r.l. (composite materials molding)

1999  
2001

The Lonza group splits from Algroup (formerly Alusuisse) and is listed on the Zurich stock exchange. Then, Lonza acquires the German companies Lonza Compounds Verwaltungs and Lonza Compounds, based in Miehlen

# Our Product Range

## Composites

<i>UP Resins &amp; VE Resins.....</i>	<i>11</i>
<i>Compounds.....</i>	<i>14</i>
<i>Gel Coats.....</i>	<i>15</i>
<i>Low Profile, Low Shrink Additives, Tooling &amp; Systems.....</i>	<i>16</i>
<i>Bonding Pastes.....</i>	<i>17</i>
<i>Catalysts and Cleaning Agents.....</i>	<i>18</i>

# Unsaturated Polyester Resins

Biobased Resins	PRODUCT FAMILY NAME	APPLICATIONS
	ENVIROGUARD®	<p>Abrasives, aerospace, agriculture, anti-corrosion, automotive and truck parts, building and construction, buttons, coatings, composites, corrugated sheets, electrical equipment, furniture, gel coats, household, industrial equipment and structures, injection, laminates, marine, pipes &amp; tanks (anti-corrosion, standard, cured-in-place-pipe), profiles and gratings, public transport, putties &amp; mastics, railway sector, sandwich panel, sanitary, sports &amp; leisure, stickers, swimming pools, synthetic marble, tanks, translucent sheets (roofing and cladding), water containers, renewable energy</p>
Polyester Hybrid Resins	XYCON®	
	PROCORE®	
Styrene-Free	ENCORE PRIME®	
Unsaturated Polyester Resins	<b>Orthophthalic Resins</b> ARMORCAST®, DISTITRON®, EASYLAM® (Low Styrene Emissions), NORSODYNE®, STYPOL®, 71X-XXXX, 77X-XXXX	
	<b>Isophthalic Resins</b> DISTITRON®, NORSODYNE®, STYPOL®, 73X-XXXX, 74X-XXX	
	<b>DCPD Resins (Dicyclopentadiene)</b> DISTITRON®, ENVIROLAM®, ENYDYNE®, POLYDYNE®, STYPOL®, 73X-XXXX, 77X-XXXX	
	<b>Special Resins</b> DISTITRON®, ENVIROGUARD®, ENYDYNE®, NORSODYNE®, 73X-XXXX, 75X-XXXX, 76X-XXXX, 77X-XXXX, 79X-XXXX	

For further information please contact us

Example of Resin

# Vinyl Ester Resins

	<i><b>PRODUCT FAMILY NAME</b></i>	<i><b>APPLICATIONS</b></i>
<b>Epoxy VE Hybrid Resins</b>	<b>XYCON® VE</b>	<p>Abrasives, aerospace, agriculture, anti-corrosion, automotive and truck parts, building and construction, buttons, coatings, composites, corrugated sheets, electrical equipment, furniture, gel coats, household, industrial equipment and structures, injection, laminates, marine, pipes &amp; tanks (anti-corrosion, standard, cured-in-place-pipe), profiles and gratings, public transport, putties &amp; mastics, railway sector, sandwich panel, sanitary, sports &amp; leisure, stickers, swimming pools, synthetic marble, tanks, translucent sheets (roofing and cladding), water containers, renewable energy</p>
	<b>Vinyl Ester Resin Blend</b> ARMORSTAR®	
<b>Vinyl Ester</b>	<b>DISTITRON® VE, EPOVIA®, EPOVIA® OPTIMUM, NUPOL®, 75X-XXXX, 78X-XXXX</b>	
<b>Vinyl Low Styrene Content</b>	<b>DISTITRON® EF Series, EPOVIA®</b>	
<b>Styrene-Free Epoxy VE</b>	<b>ENCORE PRIME®, STYROGUARD® II</b>	
<b>Tackifier</b>	<b>NUTACK®</b>	

For further information please contact us

# Compounds

PRODUCT FAMILY NAME	APPLICATIONS
BMC & SMC using Glass Fiber and/or Carbon Fiber	Automotive, building, electric and electronic, engineering, food contact, household, industry, railways, sport and leisure, tanks, tractors, transportation, trucks
Epoxy Compounds	

For further information please contact us

A carbon fiber seat molded using Polynt products

# Gel Coats

PRODUCT FAMILY NAME	APPLICATIONS
ARMORCLEAR®, ARMORCOTE®, ARMORFLEX®, ARMORGUARD®, ARMORHP®, ARMORPLUS®, ARMORPRO®, BATHCOTE®, BUFFBACK®, FIREBLOCK®, HIGLOSS TR®, IMEDGE®, PATCHAID®, POLYCOR®, POLYGEL®, SHIMMER®, STYPOL®, QUICKMIX®	Enamels, fire-retardant, industrial application (heat, corrosion & chemical resistance parts), infrastructure construction (cisterns, sanitary, synthetic marble), leisure boats & marine, marble and casting, pigment, renewable energies (wind energy), sanitary and mould manufacture, spray patching, swimming pools, tanks, tooling, transportations (buses, tractors, trucks, train parts)

For further information please contact us

Example of Gel Coat

# Low Profile, Low Shrink Additives & Tooling Systems

Low Profile & Low Shrink Additives	PRODUCT FAMILY NAME	APPLICATIONS
	NORSOLOOK®, STYPOL®	Automotive and truck parts, profiles
Tooling Systems	OPTIMOLD®, OPTIPLUS®	Tooling

For further information please contact us

An example of Low Profile & Low Shrink Additives application

# Bonding Pastes

<i>PRODUCT FAMILY NAME</i>	<i>APPLICATIONS</i>
<b>GRAVICOL®</b>	Industrial applications, transportation (automotive and truck parts), marine and wind energy (wind turbine)
<b>Putty Pastes and Adhesives</b>	Bonding tubs and sinks, tile repair, general surface leveling, granite, marble, pieces of glue, structural strengthening bus (fiber pieces)

For further information please contact us

Example of Bonding Paste

# Catalysts

<i>PRODUCT FAMILY NAME</i>	<i>APPLICATIONS</i>
<b>ANDONOX<sup>®</sup>, CUROX<sup>®</sup></b>	Initiators to ensure consistent cure of all composite resins and gel coats across various manufacturing process technologies

For further information please contact us

Polynt Australia has a broad range of methyl ethyl ketone peroxides that are used for the cure of promoted unsaturated polyester resins, gel coats and vinyl ester resins at ambient temperatures.  
A range of specialty Acetylacetone Peroxides and Cumene Hydroperoxides for closed moulding applications are also available.

# Cleaning Agents

<i>PRODUCT FAMILY NAME</i>	<i>APPLICATIONS</i>
<b>Di-Lynt</b>	Industrial tooling & cleaning
<b>THERMACLEAN<sup>®</sup>, MARBLEWASH<sup>®</sup>, WIPE-BRIGHT<sup>®</sup>, UNIWIPE<sup>®</sup>, AQUAWASH<sup>®</sup>, REPLACETONE<sup>™</sup></b>	

For further information please contact us

# Our Product Range

## Coating Resins

*Coating Resins*.....21

# Coating Resins

ALKYD RESINS: Acrylics LATEX Powders Saturated	PRODUCT FAMILY NAME	APPLICATIONS
	ACRYLAMAC®, ALCURE®, AQUAMAC®, ARCHEMIS®, CARBAMAC®, CHEMACOIL®, DURAMAC®, HYDREAU®, LUMICURE®, MACOPOL®, POLYGEL®, POLYMAC®, REZIMAC®	Aerospace, architectural interior and exterior, automotive, general metals, industrial maintenance, industrial wood, machinery & equipment, marine, metal furniture, stains, transportation, varnishes

For further information please contact us

&

## Specialties

*Anhydrides and Acids.....23*

*Catalysts.....24*

*Special Anhydrides.....25*

*Special Esters.....26*

*Plasticizers.....28*

*Others.....29*

# Anhydrides and Acids

	<i>PRODUCT FAMILY NAME</i>	<i>APPLICATIONS</i>
<b>Anhydrides</b>	<b>Phthalic Anhydride, Maleic Anhydride, Trimellitic Anhydride, Tetrahydrophthalic Anhydride</b>	Adhesives, agriculture, animal feed, building and construction, chemical industry, coatings, consumer goods, cosmetics, crop protection, detergents, electronic and electrical, food and beverage, flavors and fragrances, household, industrial sector, intermediates for chemical synthesis, inks and pigments, leather treatment, lubricants, pharmaceutical, paper industry, polymers and plastics, solvents, synthetic fibers, water treatment
<b>Acids</b>	<b>Malic Acid and Fumaric Acid</b>	

For further information please contact us

# Catalysts

<i><b>PRODUCT FAMILY NAME</b></i>	<i><b>APPLICATIONS</b></i>
<b>POLYCAT ALMA, POLYCAT MAC4, POLYCAT MAC6</b>	Oxidation Catalysts for Maleic Anhydride from n-butane (fluid and fix bed technology) and benzene
<b>POLYCAT PA</b>	Oxidation Catalysts for Phthalic Anhydride
<b>POLYCAT PMDA-25</b>	Oxidation Catalysts for Pyromellitic Anhydride
<b>CMC</b>	Custom Manufactured Catalysts

For further information please contact us

Example of Catalysts

# Special Anhydrides

PRODUCT FAMILY NAME	APPLICATIONS
<b>MTHPA</b> (Methyltetrahydrophthalic Anhydride)	Aerospace, automotive, building and construction, chemical industry, coatings, electric and electronic, intermediates for chemical synthesis, marine, polymers and plastics, renewable energy
<b>METH</b> (Methylnadic Anhydride)	
<b>Special Hydrogenated Anhydrides/Cycloaliphatic:</b> <b>HHPA</b> (Hexahydrophthalic Anhydride); <b>MHHPA</b> (Methylhexahydrophthalic Anhydride) <b>Special Grades;</b> <b>Anhydride 70/30; Succinic Anhydride</b>	
<b>Pre-accelerated and Modified Special Anhydride:</b> <b>MTHPA</b> (Methyltetrahydrophthalic Anhydride) <b>Special Grades</b>	

For further information please contact us

# Special Esters

PRODUCT FAMILY NAME	APPLICATIONS
Glycerol Esters (Triacetin, Diacetin, Priacetin, Tripropionin, Tributyrin)	Adhesives, agriculture, automotive, building and construction, chemical industry, coatings, cosmetics, detergents, electric and electronic, food and beverage, foundries, flavors and fragrances, intermediates for chemical synthesis, inks and pigments, marine, leisure and clothing, lubricants, medical and pharmaceutical, polymers and plastics, solvents, synthetic fibers, tobacco industry, water treatment
Phthalates - Low molecular weight (DEP, DMP)	
Acetates	
Acetates of Glycol Ethers	
Maleates and Fumarates	
Citrates	
Sebacates	
Benzoates	
Succinates	
Esters of Fatty Acids (Laurates, Oleates and Stearates)	
Organometallic Salts	
Trimellitates - Low molecular weight (TMTM)	
Hexahydrophthalates	

For further information please contact us

Two examples of DEP application

# Plasticizers

General Purpose Plasticizers	PRODUCT FAMILY NAME	APPLICATIONS
	DEHP Medical Grade - DIPLAST® O/MG	
	DINP - DIPLAST® NS	
	DPHP - DIPLAST® RS	
Special Purpose Plasticizers	<b>Linear Phthalates:</b> DIPLAST® L 9-11, DIPLAST® L 11	Automotive, building and construction, consumer goods, electronic and electrical, food contact materials, household, leisure and clothing, lubricants, medical devices, polymers and plastics
	<b>Trimellitates:</b> DIPLAST® Grades TM, TM8-10, TM8, TM9, TM10, TM13, TINTM/ST	
	<b>Adipates and Polymeric:</b> DIPLAST® D (DOA), DIPLAST® D/MG (DOA Medical Grade), <b>Polimix®</b> , <b>Uraplast®</b>	

For further information please contact us

Example of Plasticizer

## Others

In addition to our core products, Polynt Group is positioned to supply products and materials throughout Canada and Australia, allowing our valuable customers to meet their needs with "one-stop shopping" through our experienced, dedicated distributors. These additional product categories are highlighted here:

<i><b>PRODUCT FAMILY NAME</b></i>	<i><b>APPLICATIONS</b></i>
<b>Acetone, Corflex 100, Ethyl Acetate, Methyl Ethyl Ketone, Methyl Methacrylate, Styrene Monomer, Toluene, Wax in Styrene</b>	Chemicals and solvents
<b>Nidaplast, U-Pica Low Density Bulker Mat, Flexokore Balsa Materials</b>	Core materials
<b>West System, Perfect Gloss Decorative Coating, Rapid Cure Epoxy Kit, Techniglue CA</b>	Epoxy systems
<b>Wacker, Envirospheres, Q-Cel and Omya</b>	Lightweight and high density fillers
<b>ERA Polymers</b>	Pouring polyurethane foams & rubbers
<b>E-Glass; Specialty Reinforcements: ECR, C, AR Glasses</b>	Reinforcements
<b>Masks, Safety Goggles, Gloves, Barrier Guard Cream, Handwash, Eyewash bottle</b>	Safety & personal protective equipment (PPE)
<b>Mould Release Systems: Zyvax, Rexco; Surface Finishes: Farecla</b>	Surface technologies

For further information please contact us

## For a better way of life

Polynt Group continues to deliver a diverse range of products that serve the key sectors of agribusiness, biomedical, construction, electronics, transportation and marine industries.

Our production base is comprised of three sectors: Composites, Intermediates and Specialties.

We are an essential contributor in the creation of thousands of objects that help improve the quality of life.

Through our personalized design solutions dedicated to satisfying each sector's needs and our industrial clients' requirements, we continue to enjoy a loyal customer base.

# Responsible Care

## Health and Environment: a commitment with three objectives

### **Commitment to Environmental Improvement**

Awareness of the needs of local communities that host Polynt Group's plants, plus continual reduction of environmental impact

### **Composites help to reduce consumption of Natural Resources**

Development of new products to progressively substitute natural raw materials in the production of objects and technological equipment

### **Product Safety**

Creation of recyclable products to reduce impact on environment and human health

## Polynt Key Success Factors

- Global Specialty Player
- An integrated and efficient business model
- A diversified range of products for every application
- Technology Leadership
- A suitable production capacity
- A wealth of reliable experience
- A long-lasting loyal customer base
- A long-term care for environment

## Our Values

- Responsibility
- Transparency
- Honesty
- Passion
- Enthusiasm
- Identification
- Respect
- Courage
- Humility

# Production Technologies

Our know-how includes some of the major chemical production technologies. [Homogeneous liquid phase oxidation](#) and [heterogeneous gas phase oxidation](#) represent the starting point for the production of Phthalic, Maleic and Trimellitic Anhydrides. These processes are based on the use of proprietary tailor-made catalysts.

Starting from these building blocks and thanks to specific production technologies, Polynt Group developed a wide range of products suitable for a large number of market applications varying from electrical and automotive to medical and fragrances.

In this field we devote great care to R&D activity, technology implementation, and process control in order to satisfy the growing standard demand for safety and quality that current regulations and markets require.

## MAIN PRODUCTION TECHNOLOGIES

Esterification	Special Esters production for food & fragrances and PVC plasticization
Polyesterification	Saturated & Unsaturated Polyester Resins, Alkyds, and Polymeric PVC plasticizers production
Polyesterification: Powdering	Powder Coating Resins production
Diels-Alder	Special Anhydrides production for curing of epoxy resins
Hydrogenation	Special Esters and Special Anhydrides production
Isomerization	Special Anhydrides production
Addition Reaction	Malic Acid, Vinyl Ester Resins, and Solution Acrylics production
Moulding Compounds	Fibers reinforced thermoset Moulding Compounds production
Emulsification	Mixing of different components for Gel Coats production

## Fitting the Future

Our R&D activity objective is to create products that favorably contribute to consumer needs while continuing to ensure rigorous environmental and health safeguards. For that reason, every day, our laboratories focus their efforts on activities that improve the performance of the final product to broaden their range and that rationalize manufacturing processes through new technologies. These activities are always conducted keeping in mind our goal of reducing the environmental impact.

In order to reach this goal, we have benefited from the collaboration of several university institutes that allow us to frequently launch new products to the marketplace, while maintaining our traditional objective of creating a people-oriented chemical industry.

# Strategic Achievements

Our specialty chemicals business model is based on:

- Creating original development opportunities through competent and transparent leadership
- Enlarging our integrated production structure
- Improving our capacity to match the emerging market needs and diversify our fields of application by stimulating innovation and focusing attention on our clients' requirements

Our experience is the guarantee. Our success is the proof.  
Our commitment is the future.
