A growing specialty chemical industry

We believe in research, innovation and development to provide natural solutions that respect the ecosystem's equilibrium, while offering efficient alternatives to the consumption of our precious natural resources.

Since 1955 we have been active in the production, sale, research and development of organic anhydrides and their derivatives.

Our presence in the major chemical intermediates sector allows us to play a central role in activities ranging from petroleum refining to the production, sale and market distribution of finished products.

Integrated Business Model

Polynt Group internally manages the entire production-distribution chain through these operations:

- Research and development
- Production planning and sourcing of raw materials
- Production process, quality control and logistics
- Storage
- Sales and after-sales assistance with finished goods

Passion, expertise, technology and innovation

Our key products are:

- Anhydrides: Phthalic, Maleic and Trimellitic
- Specialties: GPP, SPP, Special Anhydrides, Special Esters, Catalysts and Acids
- Composites: UPR, VE, SMC, BMC, Gel Coats and Bonding Pastes
- Coating Resins

A Global Company: Innovation & Quality

Polynt Group's global footprint spans four continents with manufacturing and commercial facilities, allowing us to provide our customers with innovative and sustainable solutions.

Throughout our production chain, Polynt Group is a pioneer in responsible innovation: we combine design, quality and progress, while protecting the environment, improving the process technology.

Unsaturated Polyester Resins

Biobased Resins	PRODUCT FAMILY NAME	APPLICATIONS
	ENVIROGUARD®, ENVIROLITE®	Abrasives, aerospace, agriculture, anti-corrosion, automotive and truck parts, building and construction, buttons, coatings, composites, corrugated sheets, electrical equipment, furniture, gel coats, household, industrial equipment and structures, injection, laminates, marine, pipes & tanks (anti-corrosion, standard, cured-in-place-pipe), profiles and gratings, public transport, putties & mastics, railway sector, sandwich panel, sanitary, sports & leisure, stickers, swimming pools, synthetic marble, tanks, translucent sheets (roofing and cladding), water containers, renewable energy
Polyester Hybrid Resins	XYCON®	
	PROCORE®	
Styrene-Free	ENCORE PRIME®, POLYLITE HS™	
Unsaturated Polyester Resins	Orthophthalic Resins ARMORCAST®, DISTITRON®, EASYLAM® (Low Styrene Emissions), NORSODYNE®, POLYLITE®, STYPOL®, 71X-XXXX, 77X-XXXX	
	Isophthalic Resins DISTITRON®, NORSODYNE®, POLYLITE®, STYPOL®, 73X-XXXX, 74X-XXX	
	DCPD Resins (Dicyclopentadiene) DISTITRON®, ENVIROLAM®, ENYDYNE®, POLYLITE®, POLYDYNE®, STYPOL®, 73X-XXXX, 77X-XXXX	
	Special Resins ATPRIME®, DION®, DISTITRON®, ENVIROGUARD®, ENYDYNE®, HYDREX®, NORSODYNE®, 73X-XXXX, 75X-XXXX, 76X-XXXX, 77X-XXXX, 79X-XXXX

Example of Resin

Vinyl Ester Resins

	<i>PRODUCT FAMILY NAME</i>	<i>APPLICATIONS</i>
Epoxy VE Hybrid Resins	XYCON® VE, DION®	Abrasives, aerospace, agriculture, anti-corrosion, automotive and truck parts, building and construction, buttons, coatings, composites, corrugated sheets, electrical equipment, furniture, gel coats, household, industrial equipment and structures, injection, laminates, marine, pipes & tanks (anti-corrosion, standard, cured-in-place-pipe), profiles and gratings, public transport, putties & mastics, railway sector, sandwich panel, sanitary, sports & leisure, stickers, swimming pools, synthetic marble, tanks, translucent sheets (roofing and cladding), water containers, renewable energy, spar caps.
	Vinyl Ester Resin Blend ARMORSTAR®, HYDREX®	
Vinyl Ester	DION®, DISTITRON® VE, EPOVIA®, EPOVIA® OPTIMUM, NUPOL®, 75X-XXXX, 78X-XXXX	
Vinyl Low Styrene Content	DION®, DISTITRON® EF Series, EPOVIA®	
Styrene-Free Epoxy VE	ENCORE PRIME®, POLYLITE® HS, STYROGUARD® II	
Tackifier	NUTACK®	

For further information please contact us

Compounds

PRODUCT FAMILY NAME	APPLICATIONS
BMC (Bulk Moulding Compounds) SMC (Sheet Moulding Compounds) Polyester, vinylester and epoxy thermosetting material reinforced with glass fiber	Automotive, trucks, railways, tractors, electric and electronic, household, building, aircraft, engineering, industrial, food contact, sport and leisure, panels
Polynt SMCarbon® - epoxy and vinylester SMC reinforced with carbon fiber	Automotive, aircraft, industrial, sport and leisure, engineering, structural applications
Polynt UDCarbon® - epoxy and vinylester composite reinforced with unidirectional tape carbon fiber	Structural applications, automotive, industrial
Polynt RECarbon® - epoxy and vinylester composites reinforced with recycled carbon fiber fleece	Semi-structural materials, veil for optimized surfaces
Polynt BMCarbon® - epoxy and vinylester BMC reinforced with short chopped carbon fiber	Sport and leisure, industrial
Polynt TXTCarbon® - epoxy and vinylester composite material reinforced with fabric carbon fiber	Automotive, aircraft, industrial, sport and leisure, engineering, structural applications

For further information please contact us

A carbon fiber seat molded using Polynt products

Gel Coats

PRODUCT FAMILY NAME	APPLICATIONS
ARMORCLEAR™, ARMORCOTE®, ARMORFLEX™, ARMORGUARD®, ARMORHP®, ARMORPLUS®, ARMORPRO®, BATHCOTE®, BUFFBACK®, CENTERGEL, FIREBLOCK™, FUSION™, HIGLOSS TR®, IMEDGE™, NORPOL™, PATCHAID™, POLYCOR™, POLYGEL®, SHIMMER®, STYPOL®, QUICKMIX™, QUICKMIX & POLYCOLOR SERVICE™	Enamels, fire-retardant, industrial application (heat, corrosion & chemical resistance parts), infrastructure construction (cisterns, sanitary, synthetic marble), leisure boats & marine, marble and casting, pigment, renewable energies (wind energy), sanitary and mould manufacture, spray patching, swimming pools, tanks, tooling, transportations (buses, tractors, trucks, train parts)

For further information please contact us

Example of Gel Coat

Low Profile, Low Shrink Additives & Tooling Systems

Low Profile & Low Shrink Additives	PRODUCT FAMILY NAME	APPLICATIONS
Tooling Systems	NORPOL™, NORSOLOOK™, STYPOL®	Automotive and truck parts, profiles
	NORPOL™, OPTIMOLD™, OPTIPLUS™, POLYLITE™, POLYNT™	Tooling

For further information please contact us

An example of Low Profile & Low Shrink Additives application

Bonding Pastes

PRODUCT FAMILY NAME	APPLICATIONS
GRAVICEL™, GRAVICOL™, GRAVIPLAST™, NORPOL™	Industrial applications, transportation (automotive and truck parts), marine and wind energy (wind turbine)

For further information please contact us

Example of Bonding Paste

Catalysts

<i>PRODUCT FAMILY NAME</i>	<i>APPLICATIONS</i>
NORPOL®	Initiators to ensure consistent cure of all composite resins and gel coats across various manufacturing process technologies

For further information please contact us

Cleaning Agents

<i>PRODUCT FAMILY NAME</i>	<i>APPLICATIONS</i>
Di-Lynt	Industrial tooling & cleaning
THERMACLEAN®, MARBLEWASH®, WIPE-BRIGHT®, UNIWIPE®, AQUAWASH®, REPLACETONE™	

For further information please contact us

Our Product Range

Coating Resins

Coating Resins.....11

Polynt Group is renowned for its superior quality and extensive range of products including - but not limited to - alkyds, polyesters, urethanes, epoxy resins and curing agents, acrylics and powder coating resins.

Polynt Group offers one of the most comprehensive ranges of resin technology available in the market today.

We strive for excellence and are committed to providing unsurpassed customer service to ensure that we exceed the needs of our customers and end-users.

PRODUCT FAMILIES		APPLICATIONS
ACRYLAMAC®	Styrenated & Solution Acrylics, Acrylic Polyols	Aerospace, architectural interior and exterior, automotive, general metals, industrial maintenance, industrial wood, machinery & equipment, marine, metal furniture, stains, transportation, varnishes
ALCURE®	Powder Curing Agents	
AMBERLAC®	Modified Alkyds & Copolymers	
AQUAMAC®	Latex	
ARCHEMIS®	Long Oil Alkyds	
AROFLINT®	Non-Isocyanate 2K Systems	
AROLON®	Styrenated & Solution Acrylics, Acrylic Polyols	
AROPLAZ®	Polyesters	
BECKOSOL®	Solvent-borne Alkyds	
BECKOSOL AQ®	Alkyd Emulsions	
BECKOSOL AQUA®*	Alkyd Emulsions	
CARBAMAC®	Solvent-borne Oil Modified Urethanes & Uralkyds	
CHEMACOIL®	Vinyl Oxazoline Esters	
DURAMAC®	Conventional Alkyds	
EPOTUF®	Epoxy Resins & Curing Agents	
FINE-CLAD®	Powder Coating Resins	
FINE-TONE®	Digital Printing Ink Resins	
HYDREAU®	Polyester Dispersions	
KELSOL®	Waterborne & Water-Reducible Alkyds	
MACOPOL®	Copolymer Resins	
POLYMAC®	Liquid & Powder Polyesters	
RESAFEN®	Phenolics	
RESANITE®*	Rosin Phenolic Ester Resins for Offset Inks	
REZIMAC®	Modified Alkyds & Epoxy Esters	
SUPER RESANITE®*	Alkyl Phenolic Resins	
SYNTHEMUL®	Non-Styrenated & Vinyl Acrylics	
UROTUF®	Urethanes	

* Brazil Only

Our Product Range

<p>Intermediates</p> <p><i>Anhydrides and Acids.....12</i></p> <p><i>Catalysts.....13</i></p>	<p>&</p>	<p>Specialties</p> <p><i>Special Anhydrides.....13</i></p> <p><i>Special Esters.....14</i></p> <p><i>Plasticizers.....15</i></p> <p><i>Others.....15</i></p>
--	---------------------	---

Anhydrides and Acids

	<i>PRODUCT FAMILY NAME</i>	<i>APPLICATIONS</i>
Anhydrides	Phthalic Anhydride, Maleic Anhydride, Trimellitic Anhydride, Tetrahydrophthalic Anhydride	Adhesives, agriculture, animal feed, building and construction, chemical industry, coatings, consumer goods, cosmetics, crop protection, detergents, electronic and electrical, food and beverage, flavors and fragrances, household, industrial sector, intermediates for chemical synthesis, inks and pigments, leather treatment, lubricants, pharmaceutical, paper industry, polymers and plastics, solvents, synthetic fibers, water treatment
Acids	Malic Acid and Fumaric Acid	

For further information please contact us

Catalysts

<i>PRODUCT FAMILY NAME</i>	<i>APPLICATIONS</i>
POLYCAT ALMA, POLYCAT MAC4, POLYCAT MAC6	Oxidation Catalysts for Maleic Anhydride from n-butane (fluid and fix bed technology) and benzene
POLYCAT PA	Oxidation Catalysts for Phthalic Anhydride
POLYCAT PMDA-25	Oxidation Catalysts for Pyromellitic Anhydride
CMC	Custom Manufactured Catalysts

For further information please contact us

Special Anhydrides

<i>PRODUCT FAMILY NAME</i>	<i>APPLICATIONS</i>
MTHPA (Methyltetrahydrophthalic Anhydride)	Aerospace, automotive, building and construction, chemical industry, coatings, electric and electronic, intermediates for chemical synthesis, marine, polymers and plastics, renewable energy
METH (Methylnadic Anhydride)	
Special Hydrogenated Anhydrides / Cycloaliphatic:	
HHPA (Hexahydrophthalic Anhydride); MHHPA (Methylhexahydrophthalic Anhydride) Special Grades; Anhydride 70/30; Succinic Anhydride	
Pre-accelerated and Modified Special Anhydride: MTHPA (Methyltetrahydrophthalic Anhydride) Special Grades	

For further information please contact us

Special Esters

PRODUCT FAMILY NAME	APPLICATIONS
Glycerol Esters (Triacetin, Diacetin, Priacetin, Tributyrin)	Adhesives, agriculture, automotive, building and construction, chemical industry, coatings, cosmetics, detergents, electric and electronic, food and beverage, foundries, flavors and fragrances, intermediates for chemical synthesis, inks and pigments, marine, leisure and clothing, lubricants, medical and pharmaceutical, polymers and plastics, solvents, synthetic fibers, tobacco industry, water treatment
Phthalates - Low molecular weight (DEP, DMP)	
Acetates	
Acetates of Glycol Ethers	
Maleates and Fumarates	
Citrates	
Sebacates	
Benzoates	
Succinates	
Esters of Fatty Acids (Oleates and Stearates)	
Organometallic Salts	
Trimellitates - Low molecular weight (TMTM)	
Hexahydrophthalates	

For further information please contact us

Two examples of DEP application

Plasticizers

	<i>PRODUCT FAMILY NAME</i>	<i>APPLICATIONS</i>
General Purpose Plasticizers	DEHP Medical Grade - DIPLAST® O/MG	Automotive, building and construction, consumer goods, electronic and electrical, food contact materials, household, leisure and clothing, lubricants, medical devices, polymers and plastics
	DINP - DIPLAST® NS also available as stabilized (ST) grade	
	DPHP - DIPLAST® RS also available as stabilized (ST) grade	
Special Purpose Plasticizers	Linear Phthalates: DIPLAST® L 9-11, DIPLAST® L 11 - also available as stabilized (ST) grade	
	Trimellitates: DIPLAST TM - also available as stabilized (ST) grade, DIPLAST TM8, DIPLAST TM8-10/ST, DIPLAST TM10, DIPLAST TM13, DIPLAST TINTM/ST, DIPLAST TM/MG (TOTM Medical Grade)	
	Adipates and Polymeric: DIPLAST® D (DOA), DIPLAST® D/MG (DOA Medical Grade), Polimix® , Uraplast®	

For further information please contact us

Others

In addition to core products, Polynt Group also supplies products and materials throughout Canada and Australia, allowing our valuable customers to meet their needs with "one-stop shopping" through our experienced, dedicated distributors. These additional product categories are highlighted here:

<i>PRODUCT FAMILY NAME</i>	<i>APPLICATIONS</i>
Acetone, Corflex 100, Ethyl Acetate, Methyl Ethyl Ketone, Methyl Methacrylate, Styrene Monomer, Toluene, Wax in Styrene	Chemicals and solvents
Nidaplast, U-Pica Low Density Bulker Mat, Flexokore Balsa Materials	Core materials
West System, Perfect Gloss Decorative Coating, Rapid Cure Epoxy Kit, Techniglue CA	Epoxy systems
Wacker, Envirospheres, Q-Cel and Omya	Lightweight and high density fillers
ERA Polymers	Pouring polyurethane foams & rubbers
E-Glass; Specialty Reinforcements: ECR, C, AR Glasses	Reinforcements
Masks, Safety Goggles, Gloves, Barrier Guard Cream, Handwash, Eyewash bottle	Safety & personal protective equipment (PPE)
Mould Release Systems: Zyvax, Rexco; Surface Finishes: Farecla	Surface technologies

For a better way of life

Polynt Group continues to deliver a diverse range of products that serve the key sectors of agribusiness, biomedical, construction, electronics, transportation and marine industries.

Our production base is comprised of three sectors: Composites, Intermediates and Specialties. We are an essential contributor in the creation of thousands of objects that help improve the quality of life. Through our personalized design solutions dedicated to satisfying each sector's needs and our industrial clients' requirements, we continue to enjoy a loyal customer base.

Responsible Care - Health and Environment: a commitment with 3 objectives

Commitment to Environmental Improvement - Awareness of the needs of local communities that host Polynt Group's plants, plus continual reduction of environmental impact.

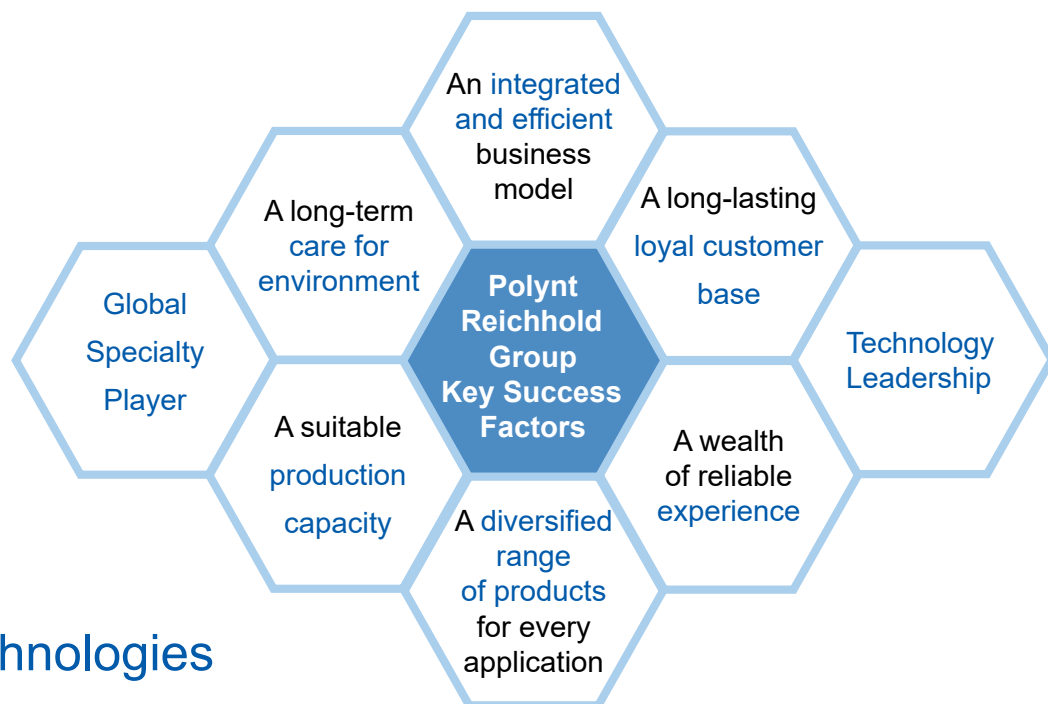

Composites help to reduce consumption of Natural Resources - Development of new products to progressively substitute natural raw materials in the production of objects and technological equipment.

Product Safety - Creation of recyclable products to reduce impact on environment and human health.

Polynt Group undertakes **LCA studies** and carefully examines the cradle-to-gate impact of its raw materials and processes. It allows to compare the environmental impact of specific raw materials and production processes, identifying areas requiring improvements and selecting the most environmentally friendly scenarios for product manufacturing.

The Group actively collaborates with customers to carry-out cradle to end-life LCA assessments.

Our Values

Production Technologies

Our know-how includes some of the major chemical production technologies. **Homogeneous liquid phase oxidation** and **heterogeneous gas phase oxidation** represent the starting point for the production of Phthalic, Maleic and Trimellitic Anhydrides. These processes are based on the use of proprietary tailor-made catalysts. Starting from these building blocks and thanks to specific production technologies, Polynt Group developed a wide range of products suitable for a large number of market applications varying from electrical and automotive to medical and fragrances.

In this field we devote great care to R&D activity, technology implementation, and process control in order to satisfy the growing standard demand for safety and quality that current regulations and markets require.

MAIN PRODUCTION TECHNOLOGIES

Esterification	Special Esters production for food & fragrances and PVC plasticization
Polyesterification	Saturated & Unsaturated Polyester Resins, Alkyds, and Polymeric PVC plasticizers production
Polyesterification: Powdering	Powder Coating Resins production
Diels-Alder	Special Anhydrides production for curing of epoxy resins
Hydrogenation	Special Esters and Special Anhydrides production
Isomerization	Special Anhydrides production
Addition Reaction	Malic Acid, Vinyl Ester Resins, and Solution Acrylics production
Moulding Compounds	Fibers reinforced thermoset Moulding Compounds production
Emulsification	Mixing of different components for Gel Coats production

Fitting the Future

Our R&D activity objective is to create products that favorably contribute to consumer needs while continuing to ensure rigorous environmental and health safeguards. For that reason, every day, our laboratories focus their efforts on activities that improve the performance of the final product to broaden their range and that rationalize manufacturing processes through new technologies.

These activities are always conducted keeping in mind our goal of reducing the environmental impact.

In order to reach this goal, we have benefited from the collaboration of several university institutes that allow us to frequently launch new products to the marketplace, while maintaining our traditional objective of creating a people-oriented chemical industry.

Strategic Achievements

Our specialty chemicals business model is based on:

- Creating original development opportunities through competent and transparent leadership
- Enlarging our integrated production structure
- Improving our capacity to match the emerging market needs and diversify our fields of application by stimulating innovation and focusing attention on our clients' requirements

**Our experience is the guarantee. Our success is the proof.
Our commitment is the future.**
