A growing specialty chemical industry

We believe in research, innovation and development to provide natural solutions that respect the ecosystem's equilibrium, while offering efficient alternatives to the consumption of our precious natural resources.

Since 1955 we have been active in the production, sale, research and development of organic anhydrides and their derivatives.

Our presence in the major chemical intermediates sector allows us to play a central role in activities ranging from petroleum refining to the production, sale and market distribution of finished products.

Integrated Business Model

Polynt Group internally manages the entire production-distribution chain through these operations:

- Research and development
- Production planning and sourcing of raw materials
- Production process, quality control and logistics
- Storage
- Sales and after-sales assistance with finished goods

Passion, expertise, technology and innovation

Our key products are:

- Anhydrides: Phthalic, Maleic and Trimellitic
- Specialties: GPP, SPP, Special Anhydrides, Special Esters, Catalysts and Acids
- · Composites: UPR, VE, SMC, BMC, Gel Coats and Bonding Pastes
- Coating Resins

A Global Company: Innovation & Quality

Polynt Group's global footprint spans four continents with manufacturing and commercial facilities, allowing us to provide our customers with innovative and sustainable solutions.

Throughout our production chain, Polynt Group is a pioneer in responsible innovation: we combine design, quality and progress, while protecting the environment, improving the process technology.

Our Product Range

Coating Resins	
Coating Resins	11

Polynt Group is renowned for its superior quality and extensive range of products including - but not limited to - alkyds, polyesters, urethanes, epoxy resins and curing agents, acrylics and powder coating resins.

Polynt Group offers one of the most comprehensive ranges of resin technology available in the market today.

We strive for excellence and are committed to providing unsurpassed customer service to ensure that we exceed the needs of our customers and end-users.

	PRODUCT FAMILIES	APPLICATIONS
ACRYLAMAC®	Styrenated & Solution Acrylics, Acrylic Polyols	
ALCURE®	Powder Curing Agents	
AMBERLAC®	Modified Alkyds & Copolymers	
AQUAMAC®	Latex	
ARCHEMIS®	Long Oil Alkyds	
	Non-Isocyanate 2K Systems	
AROLON®	Styrenated & Solution Acrylics, Acrylic Polyols	
AROPLAZ®	Polyesters	
BECKOSOL®	Solvent-borne Alkyds	Aerospace,
BECKOSOL AQ®	Alkyd Emulsions	architectural
BECKOSOL AQUA®*	Alkyd Emulsions	interior and exterior,
CARBAMAC®	Solvent-borne Oil Modified Urethanes & Uralkyds	automotive, general metals,
CHEMACOIL®	Vinyl Oxazoline Esters	industrial maintenance,
DURAMAC®	Conventional Alkyds	industrial wood,
EPOTUF®	Epoxy Resins & Curing Agents	machinery & equipment, marine,
FINE-CLAD [®]	Powder Coating Resins	metal furniture,
FINE-TONE [®]	Digital Printing Ink Resins	stains,
HYDREAU®	Polyester Dispersions	transportation,
KELSOL®	Waterborne & Water-Reducible Alkyds	varnishes
MACOPOL®	Copolymer Resins	
POLYMAC®	Liquid & Powder Polyesters	
RESAFEN®	Phenolics	
RESANITE ®*	Rosin Phenolic Ester Resins for Offset Inks	
REZIMAC®	Modified Alkyds & Epoxy Esters	
SUPER RESANITE® *	Alkyl Phenolic Resins	
SYNTHEMUL®	Non-Styrenated & Vinyl Acrylics	
UROTUF®	Urethanes	

* Brazil Only

Intermediates	&
Anhydrides and Acids	12
Catalysts	13

Specialties

Special Anhydrides......13 Special Esters......14 Plasticizers......15 Others......15

Anhydrides and Acids

	PRODUCT FAMILY NAME	APPLICATIONS				
Anhydrides	Phthalic Anhydride, Maleic Anhydride, Trimellitic Anhydride, Tetrahydrophthalic Anhydride	Adhesives, agriculture, animal feed, building and construction, chemical industry, coatings, consumer goods, cosmetics, crop protection, detergents, electronic and electrical, food and				
Acids	Malic Acid and Fumaric Acid	beverage, flavors and fragrances, household, industrial sector, intermediates for chemical synthesis, inks and pigments, leather treatment, lubricants, pharmaceutical, paper industry, polymers and plastics, solvents, synthetic fibers, water treatment				

Catalysts

PRODUCT FAMILY NAME	APPLICATIONS				
POLYCAT ALMA, POLYCAT MAC4, POLYCAT MAC6	Oxidation Catalysts for Maleic Anhydride from n-butane (fluid and fix bed technology) and benzene				
POLYCAT PA	Oxidation Catalysts for Phthalic Anhydride				
POLYCAT PMDA-25	Oxidation Catalysts for Pyromellitic Anhydride				
СМС	Custom Manufactured Catalysts				

For further information please contact us

Special Anhydrides

PRODUCT FAMILY NAME	APPLICATIONS				
MTHPA (Methyltetrahydrophthalic Anhydride)					
METH (Methylnadic Anhydride)					
Special Hydrogenated Anhydrides / Cycloaliphatic: HHPA (Hexahydrophthalic Anhydride); MHHPA (Methylhexahydrophthalic Anhydride) Special Grades; Anhydride 70/30; Succinic Anhydride	Aerospace, automotive, building and construction, chemical industry, coatings, electric and electronic, intermediates for chemical synthesis, marine, polymers and plastics, renewable energy				
Pre-accelerated and Modified Special Anhydride: MTHPA (Methyltetrahydrophthalic Anhydride) Special Grades					

Special Esters

PRODUCT FAMILY NAME	APPLICATIONS
Glycerol Esters (Triacetin, Diacetin, Priacetin, Tributyrin)	
Phthalates - Low molecular weight (DEP, DMP)	
Acetates	
Acetates of Glycol Ethers	Adhesives, agriculture, automotive, building and
Maleates and Fumarates	construction, chemical industry, coatings, cosmetics, detergents, electric and electronic,
Citrates	food and beverage, foundries, flavors and
Sebacates	fragrances, intermediates for chemical synthesis, inks and pigments, marine, leisure and clothing,
Benzoates	lubricants, medical and pharmaceutical, polymers
Succinates	and plastics, solvents, synthetic fibers, tobacco
Esters of Fatty Acids (Oleates and Stearates)	industry, water treatment
Organometallic Salts	
Trimellitates - Low molecular weight (TMTM)	
Hexahydrophthalates	
	For further information please contact us

Two examples of DEP application

Plasticizers

	PRODUCT FAMILY NAME	APPLICATIONS				
General	DEHP Medical Grade - DIPLAST [®] O/MG	Automotive, building				
Purpose Plasticizers	DINP - DIPLAST® NS also available as stabilized (ST) grade	and construction, consumer goods, electronic and				
	DPHP - DIPLAST [®] RS also available as stabilized (ST) grade					
	Linear Phthalates: DIPLAST [®] L 9-11, DIPLAST [®] L 11 - also available as stabilized (ST) grade	electrical, food contact materials, household, leisure and clothing, lubricants, medical devices, polymers and plastics				
Special Purpose Plasticizers	Trimellitates: DIPLAST TM - also available as stabilized (ST) grade, DIPLAST TM8, DIPLAST TM8-10/ST, DIPLAST TM10, DIPLAST TM13, DIPLAST TINTM/ST, DIPLAST TM/MG (TOTM Medical Grade)					
	Adipates and Polymeric: DIPLAST® D (DOA), DIPLAST® D/MG (DOA Medical Grade), Polimix®, Uraplast®

Others

In addition to core products, Polynt Group also supplies products and materials throughout Canada and Australia, allowing our valuable customers to meet their needs with "one-stop shopping" through our experienced, dedicated distributors. These additional product categories are highlighted here:

PRODUCT FAMILY NAME	APPLICATIONS
Acetone, Corflex 100, Ethyl Acetate, Methyl Ethyl Ketone, Methyl Methacrylate, Styrene Monomer, Toluene, Wax in Styrene	Chemicals and solvents
Nidaplast, U-Pica Low Density Bulker Mat, Flexokore Balsa Materials	Core materials
West System, Perfect Gloss Decorative Coating, Rapid Cure Epoxy Kit, Techniglue CA	Epoxy systems
Wacker, Envirospheres, Q-Cel and Omya	Lightweight and high density fillers
ERA Polymers	Pouring polyurethane foams & rubbers
E-Glass; Specialty Reinforcements: ECR, C, AR Glasses	Reinforcements
Masks, Safety Goggles, Gloves, Barrier Guard Cream, Handwash, Eyewash bottle	Safety & personal protective equipment (PPE)
Mould Release Systems: Zyvax, Rexco; Surface Finishes: Farecla	Surface technologies

Transportation

Sports & Leisure

Construction, Electrical & Electronic

Food & Beverages, Animal Feed

Coatings and Paints

Lubricants, Polymers & Plastics

Personal Care & Fashion Accessories

For a better way of life

Polynt Group continues to deliver a diverse range of products that serve the key sectors of agribusiness, biomedical, construction, electronics, transportation and marine industries.

Our production base is comprised of three sectors: Composites, Intermediates and Specialties. We are an essential contributor in the creation of thousands of objects that help improve the quality of life. Through our personalized design solutions dedicated to satisfying each sector's needs and our industrial clients' requirements, we continue to enjoy a loyal customer base.

Responsible Care - Health and Environment: a commitment with 3 objectives

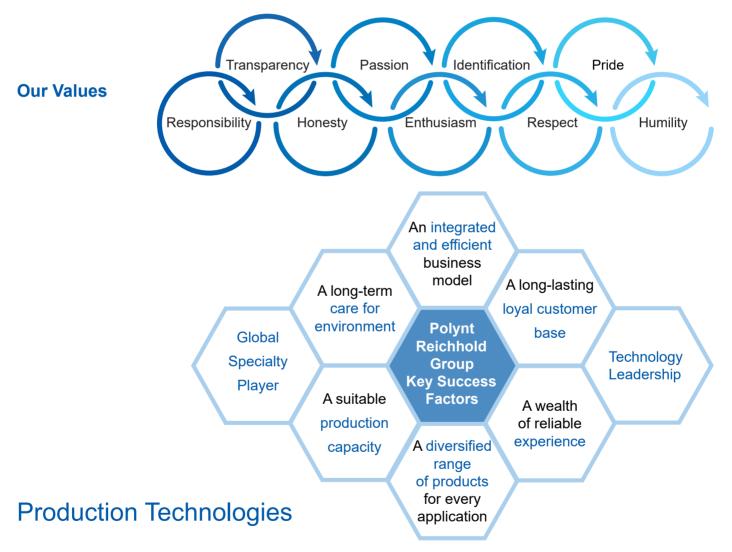

Commitment to Environmental Improvement - Awareness of the needs of local communities that host Polynt Group's plants, plus continual reduction of environmental impact.

Composites help to reduce consumption of Natural Resources - Development of new products to progressively substitute natural raw materials in the production of objects and technological equipment.

Product Safety - Creation of recyclable products to reduce impact on environment and human health.

Polynt Group undertakes **LCA studies** and carefully examines the cradle-to-gate impact of its raw materials and processes. It allows to compare the environmental impact of specific raw materials and production processes, identifying areas requiring improvements and selecting the most environmentally friendly scenarios for product manufacturing.

The Group actively collaborates with customers to carry-out cradle to end-life LCA assessments.

Our know-how includes some of the major chemical production technologies. Homogeneous liquid phase oxidation and heterogeneous gas phase oxidation represent the starting point for the production of Phthalic, Maleic and Trimellitic Anhydrides. These processes are based on the use of proprietary tailor-made catalysts. Starting from these building blocks and thanks to specific production technologies, Polynt Group developed a wide range of products suitable for a large number of market applications varying from electrical and automotive to medical and fragrances.

In this field we devote great care to R&D activity, technology implementation, and process control in order to satisfy the growing standard demand for safety and quality that current regulations and markets require.

MAIN PRODUCTION TECHNOLOGIES				
Esterification	Special Esters production for food & fragrances and PVC plasticization			
Polyesterification	Saturated & Unsaturated Polyester Resins, Alkyds, and Polymeric PVC plasticizers production			
Polyesterification: Powdering	Powder Coating Resins production			
Diels-Alder	Special Anhydrides production for curing of epoxy resins			
Hydrogenation	Special Esters and Special Anhydrides production			
Isomerization	Special Anhydrides production			
Addition Reaction	Malic Acid, Vinyl Ester Resins, and Solution Acrylics production			
Moulding Compounds	Fibers reinforced thermoset Moulding Compounds production			
Emulsification	Mixing of different components for Gel Coats production			

Fitting the Future

Our R&D activity objective is to create products that favorably contribute to consumer needs while continuing to ensure rigorous environmental and health safeguards. For that reason, every day, our laboratories focus their efforts on activities that improve the performance of the final product to broaden their range and that rationalize manufacturing processes through new technologies.

These activities are always conducted keeping in mind our goal of reducing the environmental impact.

In order to reach this goal, we have benefited from the collaboration of several university institutes that allow us to frequently launch new products to the marketplace, while maintaining our traditional objective of creating a people-oriented chemical industry.

Strategic Achievements

Our specialty chemicals business model is based on:

- Creating original development opportunities through competent and transparent leadership
- Enlarging our integrated production structure
- Improving our capacity to match the emerging market needs and diversify our fields of application by stimulating innovation and focusing attention on our clients' requirements

Our experience is the guarantee. Our success is the proof. Our commitment is the future.
