BMC<sup>®</sup> Carbon<sup>®</sup> 30 CF60-6mm

**Generic Information**

Bulk moulding compound based on Vinylester resin and reinforced with carbon fibres designed for compression moulding technology. These materials with a potential weight reduced and a freedom high design enter different areas for structural application where high mechanical properties are requested.

**Code Description**

- **BMC<sup>®</sup> Carbon<sup>®</sup> 30 CF60-6mm**
  - Carbon Fibre Length
  - Carbon Fibre Content
  - Carbon Fibre Recycled
  - Resin Code

Packaging: bag in cardboard box

- Fibre length: 6 mm
- Nominal fibre Content: 60%

Shelf life at RT 23°C: 2 months

- Typical Cure temperature: 145 ± 10 °C
- Typical moulding pressure: 30-90 bar
- Typical Cure time: 40 sec/mm

**Storage and Handling**

Store the product in its original sealed packaging at 23°C. The usual precautions when handling uncured synthetic resins and fine fibrous materials should be observed, and a Safety Data Sheet is available for this product. The use of clean disposable inert gloves provides protection for the operator and avoids contamination of material and components.
### Mechanical Properties on cured material

Properties were determined on compression-moulded specimens according UNIPLAST rules project 412 and 413
